

Planetary Concrete Mixer:

Planetary concrete mixer will be suitable for high purity concrete mixing plant, which can make the material more uniform mixing, and will be the best choice for building blocks and precast industry;

1. This planetary concrete mixer can stay more time by way of oil / manual dual mode switch discharge door.
2. Economic and durable, convenient maintenance;
3. Compare with the same amount of twin shaft concrete mixer, the planetary concrete mixer can be highly low, easy mixing station layout planning;
4. Optional aggregate lifting device;
5. 0.5m³~2.0m³ capacity specifications of planetary concrete mixer can be optional.

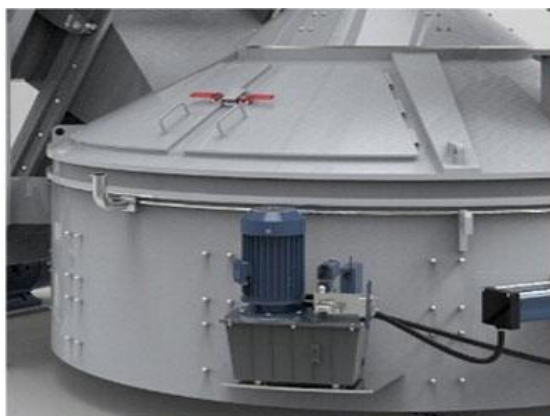

Reduction Gearbox

The Gear box unit, specially designed for a balanced distribution of power to the various mixing device, ensures a high efficiency and low noise rotation.

Maintenance Access

1. The large access facility is for easy maintenance and cleaning.
2. The key-operated safety switch guarantees the motor can not be powered with cover open.

Hydraulic Unit

Hydraulic unit equipment with manual pump allows the door be opened in case of electric failure.

Discharging Door

1. The discharging door is equipped with limit switches which can be opened at any angle.
2. Maximum three discharging doors are available.
